

Mothers in Delhi

According to India's National Family Health Survey-4, 2015-16:

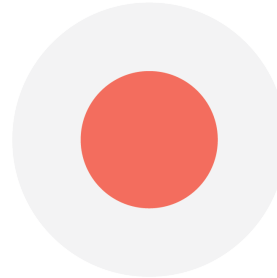

Antenatal Care

Only **37.3%** of mothers in Delhi received full antenatal care during their pregnancies.

Anemia

45.1% of pregnant women between the ages of 15 and 49 are anemic.

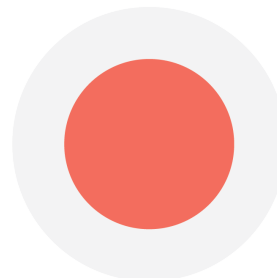

Postnatal Care

62.6% received postnatal care from healthcare personnel within two days of delivery.^{xi}

Cash Entitlement

Only **7.9%** of women received a cash entitlement under the JSY scheme for births delivered in an institution.

Iron/Folic Acid

49.9% of mothers consumed iron/folic acid, a crucial pregnancy supplement, for at least 100 days during their pregnancies.
